scott williams

Hi! I'm Scott Williams

I am currently enrolled at a university and so far I have learned a significant amount about being a conceptual designer. I hope to gain even more knowledge by applying these skills through real situations in a professional environment that I can make my career. As I grow my current skills into strengths and add layers of new skills, I'm confident that I can help take any situation to the next level.

But wait there's more:

Details, Details, Details

I want to improve everything around me and I strongly believe that this only comes true when there is strong focus on the details.

I Love to Learn

Through more knowledge I can develop creative and intuitive solutions to solve problems, and it's very rewarding when it works!

I Can Wear As Many Hats As Needed

It's valuable to be able to find a person that is confortable doing different "jobs." I'm a coder, I can design, I communicate very well, I can research, and I thrive on bumbs in the road because they only motivate me more to get the job done right! All of this is done because of my strong ability to have the right perspective in any given situation.

Education

Working on BA in Visual Communication Design & UX/UI Certificate

Eastern Washington University - Design Core 3.8 GPA
On track to graduate March 2016
